Experience

FullStack Developer — Healthcare Center (2000 - 2010)

- Built back-end components for healthcare systems using Python, delivering data-driven features and automation.
- Developed microservices for retail systems in Python, enabling scalable and cohesive services.
- Implemented SQL queries and data workflows to support application requirements and reporting needs.

Full Stack Developer — Web Systems Org (2010 - 2026)

- Delivered complex software requirements using feature-team collaboration (Scrum) to meet business goals.
- Developed and maintained SQL-driven functionality and back-end services supporting web applications.
- Contributed to microservices-based architecture and integrated services via REST APIs.

Skills

Python, PySpark, SQL, Microservices, Node.js, REST APIs, Cloud, Git, SCRUM

Education

Software development engineering - UNAM (2000 - 2005)

Scrum Certificate - ScrumStudy (2022)
